# Manhattan SC52 & Como SC53

## Space Copenhagen

### 2020

Welcome warmth into the home with Space Copenhagen's new portable table lamps.

Ensure the ambiance is always right with two new table lamps from Space Copenhagen: Manhattan SC52 and Como SC53. Both portable, these pieces are equipped with a discreet dimmer that allows for three different settings to match lighting to mood.

Manhattan's columned base, made from anodized aluminium, lends a subtle ridging effect to its industrial silhouette. This interaction between softness and heaviness is explored further by the addition of a cream-coloured canvas shade that contrasts with the dark vertical base.

Como is also crafted from anodized aluminium, with a sturdy base that tapers up towards a mushroom-shaped shade. Although it's made entirely from metal, there is a gentleness to its curves that feels thoroughly contemporary.

Space Copenhagen founders Signe Bindslev Henriksen and Peter Bundgaard Rützou refer to their approach as "poetic modernism" – a description that reflects their ongoing quest to balance opposites in order to forge a new design language. Manhattan and Como embody this interplay: while their soft, clean shapes have a timeless element, the lamps are equipped with the latest technology. Both boast 11 hours of operating time in the highest setting, with an extra battery option for additional operating. A magnetic USB charging cable ensures easy charging.

"Our new lamps were designed as multipurpose pieces that could be moved easily around the home," says Henriksen. "Take advantage of their portability – they can follow you from lighting the living room to sitting on a bedside table - and Como you can bring outside too."

Founded in 2005, Space Copenhagen is a design studio that works across multiple disciplines, from furniture and lighting to art installations and interior design. The studio's commitment to quality and longevity results in contemporary designs with timeless appeal.

&Tradition is a Danish design company established in 2010 with the founding principle being tradition tied to innovation. Our unique portfolio of furniture and lighting spans from the 1920s to the present day and includes designs by internationally renowned designers.
