Reframe | Soap shelf - Brushed steel

Reframe Soap shelf - Brushed steel

The soap shelf is made of a strengthened steel plate, with a groove that allows the water to drain away, there is a thin laser-cut 'anti-slip' barrier around the edge, to prevent shampoo and other products from sliding off.

The pack contains all necessary fittings, screws and an Unbraco key for assembly.

The shelf is formatted for the inclusion of a shower wiper, discretely placed under the shelf on the magnetic bracket. The shower wiper can be purchased in addition to the shelf.
